

## St Agnes' Community Garden

What used to be an eyesore and a dumping ground for all sorts of rubbish was transformed to a beautiful garden to be enjoyed by the community. The garden seemed to have been taken care of some years ago, but had become overgrown with old shrubs and weeds that were near enough impossible to control.

Matters were taken into hand when an application to the Heritage Lottery Fund 'Awards for All' programme yielded the resources to hire the professionals to clear the area and replant it with grass.

A border was included that needed some extra work from the vicar!

And ...

... beautiful plants including shrubs and perennial have now been planted.
